ISOC Pulse IXP Tracker

Amreesh Phokeer
Internet Measurement and Data Expert
phokeer@isoc.org

pulse.internetsociety.org

Your Data Dashboard

- Launched December 2020.
- We curate Internet measurement data from trusted sources to help everyone gain deeper, data-driven insight into the Internet.

Trusted data from multiple sources:

- **Benefit**: Helps to assess whether efforts to ensure that the Internet remains open, globally connected, secure, and trustworthy are working.
- **Benefit:** Allows policymakers, researchers, journalists, network operators, civil society groups, and others to better understand the health, availability, and evolution of the Internet.

Pulse Data Partners

Pulse tracks

Shutdowns: Where do Internet shutdowns take place?

Net Loss: Estimate the economic impacts of Internet shutdowns.

Technologies: Tracking the deployment of technologies critical for the evolution of the Internet.

Concentration: How much are services concentrated in the hands of a few?

Resilience: How robust is the Internet ecosystem?

Pulse tracks

- **Shutdowns**: Where do Internet shutdowns take place?
- **Net Loss:** Estimate the economic impacts of Internet shutdowns.
- **Technologies**: Tracking the deployment of technologies critical for the evolution of the Internet.
- **Concentration**: How much are services concentrated in the hands of a few?
- **Resilience**: How robust is the Internet ecosystem?
- **IXP Tracker**: monitors the growth of IXPs globally

IXP Tracker

IXP Tracker (now and future)

Monitors growth and development

Tracks key growth metrics of IXPs globally

Evaluates performance and reliability

Provides information on the performance and resilience of networks at the IXP.

Facilitates network optimization

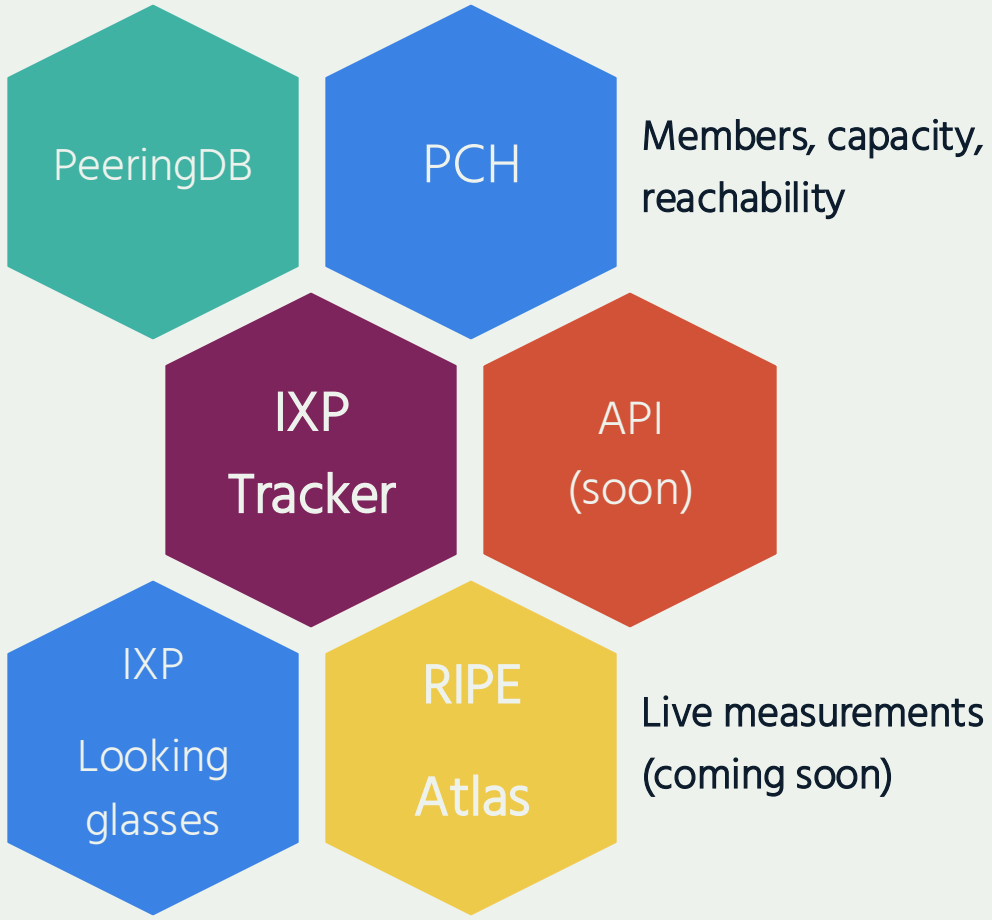
Provides up-to-date information to enable data-driven peering decisions.

Foster community engagement

Provides a platform for IXP members to connect, share knowledge, and collaborate.

Components

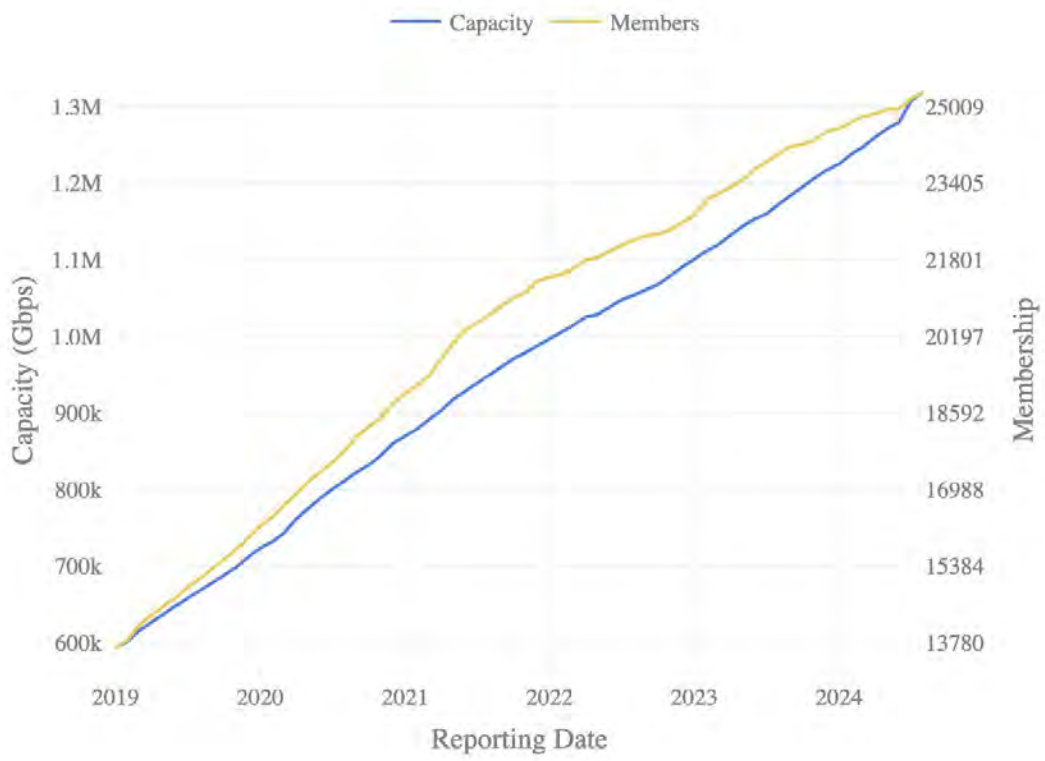
1. Collects data on more than 1000 IXPs globally from PeeringDB/PCH.
2. Provides information about capacity and membership growth.
3. Shows a country and an IXP view.



Global view

IXP capacity growth over time

The global total of IXPs over time, shown along with the growth in combined capacity offered by the world's IXPs.



Top 10 countries/territories by IXP coverage

Internet users in these countries have the highest proportion of access to their local Internet via IXPs.

- Suriname : 85.71%
- Sint Maarten (Dutch part) : 75.00%
- Saint Martin (French part) : 71.43%
- Trinidad and Tobago : 66.67%
- Saint Kitts and Nevis : 62.50%
- Djibouti : 60.00%
- Grenada : 60.00%
- Réunion : 57.14%
- Burundi : 55.56%
- South Africa : 53.77%

Country view

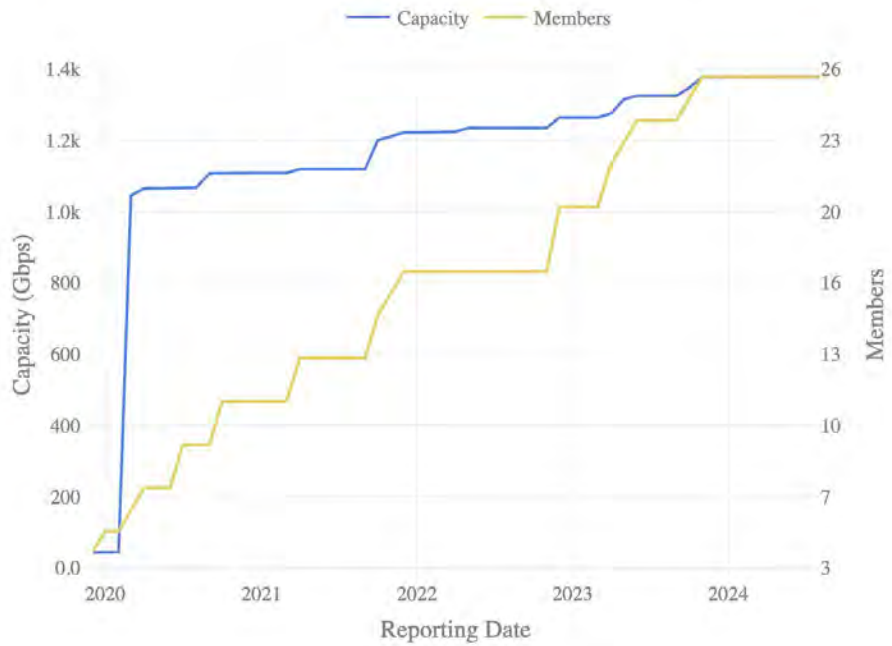
Country:

Congo (the Democratic Republic of the)

Select

IXP capacity growth over time in Congo (the Democratic Republic of the)

The total of IXPs over time, shown along with the growth in combined capacity.



Congo (the Democratic Republic of the)

Active Internet Exchange Points

The total number of IXPs in operation in Congo (the Democratic Republic of the), as of August 2024.

4

Active IXPs

33.33 %

Proportion of the local Internet that can be reached through IXPs in this country.

IXPs in Congo (the Democratic Republic of the)

IXP Name	▲ Location
Africa Congo Internet eXchange - ACIX	Kinshasa
Goma Internet eXchange - GOMIX	Goma
KINshasa Internet eXchange - KINIX	Kinshasa
Lubumbashi internet exchange point - LUBIX	Lubumbashi

IXP view - KINIX

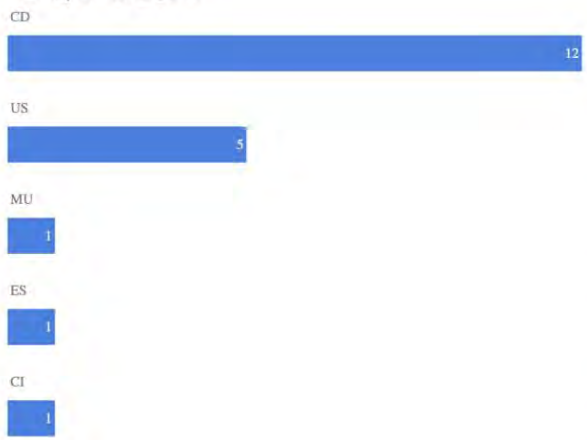
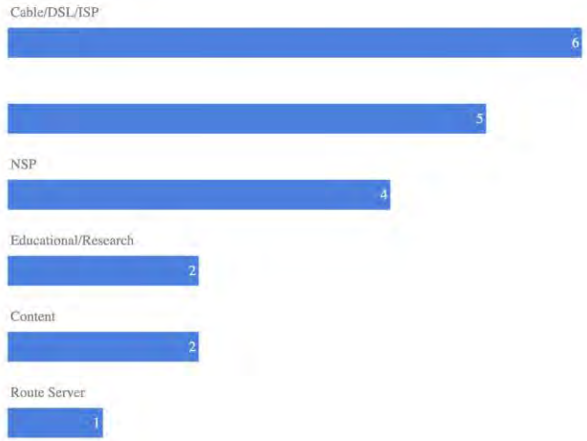
of ASNs

Members

Countries of registration

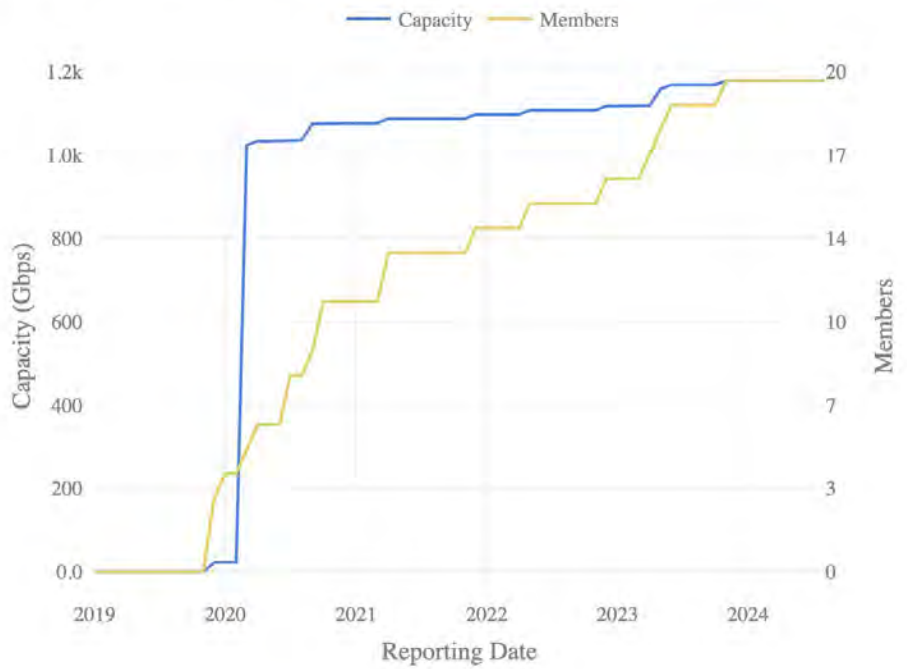


AS Types



How this IXP has grown over time

The number of members in this IXP, shown along with the total capacity available.

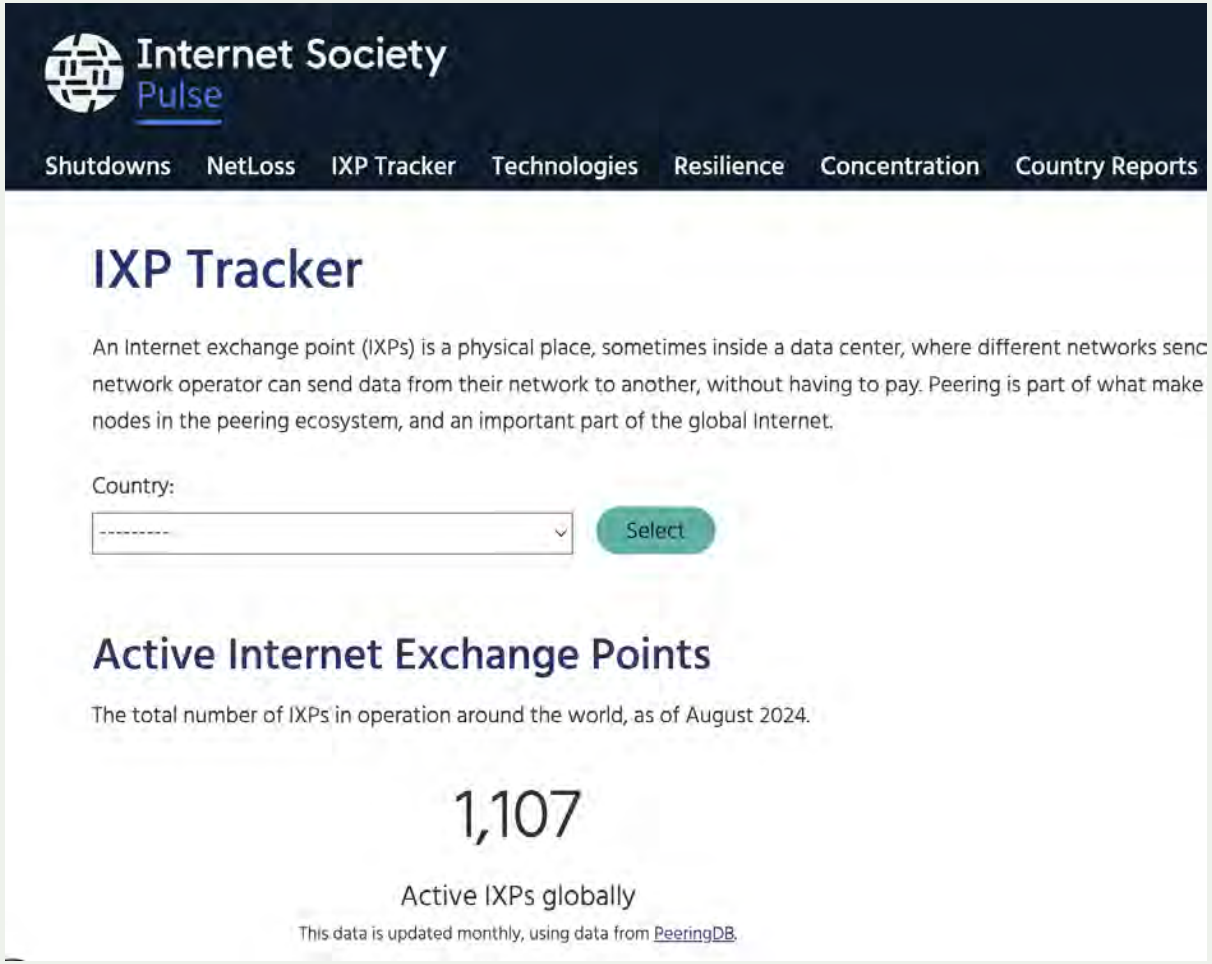


AS Name	ASN	AS Type	Member Since	RS Peer	Speed	Registration Country
Afrinet	37415	NSP	Sept. 23, 2020	Yes	1000	Congo (the Democratic Republic of the)
AFR-IX Telecom	60171	NSP	March 22, 2021	Yes	10000	Spain
Airtel DRC AS37020	37020	—	Nov. 6, 2019	Yes	20000	Congo (the Democratic Republic of the)
Cloudflare	13335	Content	April 12, 2023	Yes	40000	United States of America
Global Broadband Solution	43256	NSP	Dec. 2, 2019	Yes	1000	United States of America
GVA	36924	Cable/DSL/ISP	Oct. 26, 2023	No	10000	Côte d'Ivoire
ITM DR Congo	37571	—	March 9, 2023	Yes	1000	Congo (the Democratic Republic of the)

IXP Tracker 2.0

Additional features

- **AS level:** shows details about IXPs where a given AS is connected, including prefixes, address space and customer cone.
- **Prefix level:** displays information about all the IXPs a given prefix is reachable, including AS Path length metrics.
- **Compare two IXPs:** reachability (prefixes and networks reachable), customer cone, AS Path length.
- **Network benefits calculator**: We can ask an AS to upload its routing table into the IXP Tracker and select an IXP to see the networking benefits.

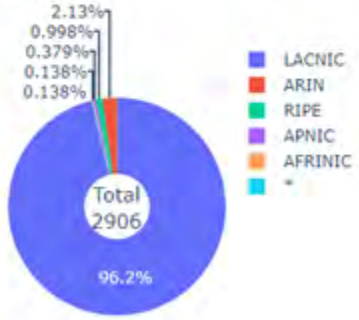


Region view - Statistics

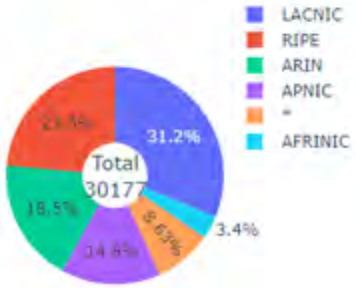
Select Region: LACNIC **IP Version:** v4

35 Number of IXPs	**1** Number of Countries	**2906** ASes connected to at least one IXP in the region.
30177 ASes reachable through IXPs in the region.	**272398** IPv4 prefixes announced at IXPs in the region.	**1282468** IPv4 prefixes (/24) announced at IXPs in the region.
20.84 % of total region allocated ASes are members of at least one IXP from the region	**70.39 %** of total region allocated ASes are reachable through IXPs from the region	**31.36 %** of total region address space is reachable through IXPs from the region

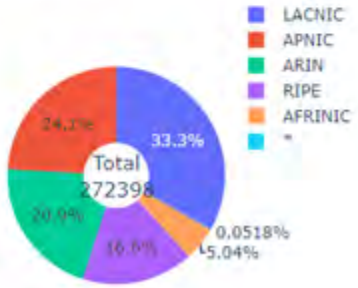
ASes connected to at least one IXP in the region.



ASes reachable through IXPs in the region.



IPv4 prefixes announced at IXPs in the region.



IPv4 prefixes (/24) announced at IXPs in the region.

Research Study

Benefits of peering

Network benefits of peering

Let's suppose a new network wants to join an IXP. We want to understand the benefits to the incoming network and the benefits to other networks?

- Number of hops to other networks
- Number of networks reachable
- Route stability and redundancy
- Latency to other peers
- Latency to content providers and CDNs (present at the IXP)
- Reachability over transit vs reachability over peering

Expected outcome: *A "calculator" that network operators can use to estimate their networking benefits.*

Economic benefits of peering

- **Cost-benefit analysis**: Estimate the "financial" benefit of using a peering link instead of a transit link, using existing datasets on pricing.

- **Economic impact of IXPs**: Estimate the longer-term impact of IXPs on the local Internet ecosystem. (E.g. affordability, Internet penetration, infrastructure).

Thank you.
